

DVA S09 Subwoofer.

A remarkably compact 15" subwoofer in a band-pass design, the DVA S09 DP delivers true, tight, and punchy bass response. With a height of just 44 cm, it can be flown above DVA T4 modules to keep the rig's footprint inconspicuous.

The S09 comes with two features that make it the perfect base for a high-quality satellite system, for example, when paired with the DVX D10. One is an integrated active stereo crossover with two cutoff frequencies to choose from, 90Hz and 120Hz. The other is a phase inversion switch. One PowerCon socket connects to the mains power supply, while two PowerCon outputs connect satellites.

SRK-09 Fly Kit

Retrofitted with the optional SRK-09 fly kit, the DVA S09 DP subwoofer is easily rigged to a DRK-10 harness and flown alongside further DVA T4 mid-/high-range units.
