

Main Features

- Full color LCD screen with improved browsing and track information
- Compatible with rekordbox™ music management software
- DJ Play using music stored inside smart phones and tablets via Wi-Fi//USB connection
- Highly evolved features including a new Beat Divide function
- Supports multiple media and formats - Smart Phone / Tablet, USB, and CDs
- High Quality audio circuitry for a faithful reproduction of sound

FEATURES

1 Smart Device Connectivity

The CDJ-900NXS is equipped for conventional and wireless connectivity. The player enables users to utilize iPhone®, iPad® and iPad touch® devices or Android™ OS devices as the source for music content and can be connected via USB or Wi-Fi®. When used, the touchscreen of the connected devices becomes the navigation tool for content. For additional convenience, the included Mac® version of rekordbox enables the CDJ-900NXS to connect to a home network and retrieve music content wirelessly from a network connected computer.

2 rekordbox™ Software Functions

The CDJ-900NXS includes rekordbox®, Pioneer's proprietary music management software that organizes and catalogs a DJ's entire music library. When music files are imported to rekordbox, the software analyzes each file and prepares it for use specifically with the new CDJ players. An iOS version for use with iPhone®, iPad® and iPad touch® devices and Android™ OS version of rekordbox are also available for preparation of music while on the go. Key elements of Pioneer's rekordbox software are:

ANALYZE:

- **Beats Per Minute (BPM) Data** – BPM and tempo information for each song is identified and processed into rekordbox for preparing and performing a set
- **Waveform Data** – The waveform of each song is identified and then displayed on screen for quick data visualization and for use with the needle search function

CUSTOMIZE:

- **Tag Info & Artwork** – Edit and customize the file information to individual performance needs
- **Cue Points and Loops** – Prepare and customize cues and loops
- **Playlists** – Create, edit, and manage customized playlists for various performances
- **Beatgrid** – Utilizing the new Quantizing feature, cue points and loops can be set perfectly on-beat

Users can then transfer the analyzed music files to their preferred storage media and play them directly from the new CDJ-900NXS. The software offers song information that can be viewed easily during performances on the player's large display for quick search and access of content by genre, title, BPM, and more. In addition, as analyzed tracks are played, the unit automatically creates and saves a play history for review of past performances.

Adapting to today's variety of media formats, the CDJ-900NXS enables playback of MP3, AAC, WAV and AIFF audio files from CDs and USB memory devices. A USB port located on top of the player enables users to switch out external storage devices quickly to minimize the need for connecting to laptop computers.

3 Large Full-Color LCD Display

The CDJ-900NXS utilizes a large full-color LCD panel to display a window of music information including track title, artist name, track number, time, tempo, beats per minute, and wave form.

SPECIFICATIONS

Compatible Media	iPhone®/iPad®/iPod touch®, Android® phone/Android Tablet etc., USB storage devices (flash, memory/HDD, etc.)
Compatible Files	Computers (Mac/Windows PC), Audio CD, CD-R/RW
File Systems Compatible with USB Storage	MP3, AAC, WAV, AIFF (iOS version of rekordbox™ enable to playback only MP3 and AAC). FAT, FAT32, HFS+
Frequency Range	4Hz - 20kHz
Signal-to-Noise Ratio	115dB or higher
Total Harmonic Distortion	0.003% or less

Supported Operating Systems	Mac OS® X 10.8, 10.7, 10.6 or 10.5.8, Windows® 8/Pro
	Windows® 7 Home Premium/Professional/Ultimate, Windows Vista® Home Basic/Home Premium/Ultimate/Business (SP2 and above)

- **Browse Screen** – Displays album art, song name and artist for quick access
- **Wave/Wave Zoom** – In addition to displaying the entire wave form of current music playing, the player offers five levels of Wave Zoom to show the details of the wave form
- **Beat Count** – Accurately displays the number of beats until a set point
- **Phase Meter** – Displays the beats/bars of the music which can also be seen on other connected players via Pro DJ Link®

4 Performance Features

- **Beat Divide** – A newly integrated function of the CDJ-900NXS, the Beat Divide enables a single beat of sound to be divided in 3/4, 1/3, 1/2, 1/4, and 1/8 increments and played for a specified number of beats without breaking the rhythm of the music.
- **Beat Sync** – The feature let users instantly match tempo and beat location of songs when CDJ players are connected to a mixer using PRO DJ LINK.
- **Quantize** – Utilizing a Quantizing feature, cue points and loops can be set perfectly on beat. The Quantize feature ensures cue points are set accurately and automatically, correcting and syncing beats during manual looping or real-time cueing to reduce off-beat mistakes.
- **Slip Mode** – When activated, Slip Mode silently continues song playback during a loop, reverse or scratch and continues audible playback at the exact time when the loop, reverse or scratch is ended, resulting in smoother transitions.
- **Wolfson® Processor** – To achieve excellent sound quality, the player is equipped with the audio industry's highly respected Wolfson® DAC processor, delivering a very transparent, accurate audio signal with a highly improved signal-to-noise ratio and increased headroom.

5 Additional Features

- **DJ software MIDI/HID control** – Each player can be used to trigger other devices, such as DJ effectors and software by way of HID and/or MIDI.
- **My Settings** – The function settings of a player can be saved to an iPhone®, iPad® and iPad touch® or USB storage device. For additional convenience, the settings can also be made on the rekordbox App or software giving users the ability to switch to their settings when connecting to a CDJ-900NXS or CDJ-2000NXS.
- **Traffic Light** – Utilizing a multi-player PRO DJ LINK connection, a green light indicating music will sound harmoniously with the key of the music being played.
- **Active Loop** – Automatically starts loops when playback begins from a specified point.
- **Beat Loop** – Enables construction of precise 4-beat loops simply by pressing a button.

* rekordbox is music file management software developed by Pioneer in cooperation with MixVibes for use in combination with Pioneer products.
 † Pro DJ Link enables up to four CDJ-900NXS or CDJ-2000NXS to be connected via the Link Port to share a single music source, whether it is a hard drive, USB and/or SD memory card.
