

Sennheiser AD1800 Paddle Antenna for 1G8

Directional Paddle Antenna for the Sennheiser 1800MHz 1G8 Range

- Passive directional antenna
- For transmission frequency range: 1800MHz range
- Significantly enhances operating range of 1800MHz wireless systems

The Sennheiser AD1800 is a passive directional paddle antenna for use with 1800MHz Sennheiser Evolution Wireless systems. When set up correctly, the AD1800 can dramatically enhance the performance of your wireless systems, giving you significantly increased operating coverage, allowing you to achieve far greater distance than standard quarter wave antennas.

Key Features:

- Passive directional antenna
- For transmission frequency range: 1800MHz range
- BNC connector, 3/8" thread for mounting on microphone stands
- Apex angle: approx. 100°

Specifications

Brand	Sennheiser
Gross Shipping Weight - Volumetric (kgs)	0.1000
Item	Antenna
Pattern	Directional
Active / Passive	Passive
Frequency Range	Optimised for 1785-1805 MHz Range
